

**EDITORIAL**

**The-more-the-better and the-less-the-better** 2187

**DISCOVERY NOTE**

*Sequence analysis*

**G8: a novel domain associated with polycystic kidney disease and non-syndromic hearing loss** 2189  
Q.-y.He, X.-h.Liu, Q.Li, D.J.Studholme, X.-w.Li and S.-p.Liang

*Structural bioinformatics*

**Scoring of predicted GRK2 phosphorylation sites in Nedd4-2** 2192  
J.W.Arthur, A.Sanchez-Perez and D.I.Cook

**ORIGINAL PAPERS**

*Genome analysis*

**Interpolated variable order motifs for identification of horizontally acquired DNA: revisiting the *Salmonella* pathogenicity islands** 2196  
G.S.Vernikos and J.Parkhill

*Sequence analysis*

**Predicting methylation status of CpG islands in the human brain** 2204  
F.Fang, S.Fan, X.Zhang and M.Q.Zhang

**A mixture model-based discriminate analysis for identifying ordered transcription factor binding site pairs in gene promoters directly regulated by estrogen receptor- $\alpha$**  2210  
L.Li, A.S.L.Cheng, V.X.Jin, H.H.Paik, M.Fan, X.Li, W.Zhang, J.Robarge, C.Balch, R.V.Davuluri, S.Kim, T.H.-M.Huang and K.P.Nephew

**Finding motifs from all sequences with and without binding sites** 2217  
H.C.M.Leung and F.Y.L.Chin

**Remote homology detection based on oligomer distances** 2224  
T.Lingner and P.Meinicke

**RBR: library-less repeat detection for ESTs** 2232  
K.Malde, K.Schneeberger, E.Coward and I.Jonassen

*Structural bioinformatics*

**Identification of function-associated loop motifs and application to protein function prediction** 2237  
J.Espadaler, E.Querol, F.X.Aviles and B.Oliva

*Gene expression*

**To permute or not to permute** 2244  
Y.Huang, H.Xu, V.Calian and J.C.Hsu

**ADGO: analysis of differentially expressed gene sets using composite GO annotation** 2249  
D.Nam, S.-B.Kim, S.-K.Kim, S.Yang, S.-Y.Kim and I.-S.Chu

**CART variance stabilization and regularization for high-throughput genomic data** 2254  
A.Papana and H.Ishwaran

**Bayesian variable selection for the analysis of microarray data with censored outcomes** 2262  
N.Sha, M.G.Tadesse and M.Vannucci

**PACK: Profile Analysis using Clustering and Kurtosis to find molecular classifiers in cancer** 2269  
A.E.Teschendorff, A.Naderi, N.L.Barbosa-Morais and C.Caldas

*Systems biology*

**Identification of transcription factor cooperativity via stochastic system model** 2276  
Y.-H.Chang, Y.-C.Wang and B.-S.Chen

**Detecting functional modules in the yeast protein-protein interaction network** 2283  
J.Chen and B.Yuan

**Global topological features of cancer proteins in the human interactome** 2291  
P.F.Jonsson and P.A.Bates

*Data and text mining*

**Text similarity: an alternative way to search MEDLINE** 2298  
J.Lewis, S.Ossowski, J.Hicks, M.Errami and H.R.Garner

**APPLICATIONS NOTE**

*Genome analysis*

**arrayQCplot: software for checking the quality of microarray data** 2305  
E.-K.Lee, S.-G.Yi and T.Park

**SynView: a GBrowse-compatible approach to visualizing comparative genome data** 2308  
H.Wang, Y.Su, A.J.Mackey, E.T.Kraemer and J.C.Kissinger

*Sequence analysis*

**Dragon Promoter Mapper (DPM): a Bayesian framework for modelling promoter structures** 2310  
R.Chowdhary, S.L.Tan, R.A.Ali, B.Boerlage, L.Wong and V.B.Bajic

*Phylogenetics*

**Serial NetEvolve: a flexible utility for generating serially-sampled sequences along a tree or recombinant network** 2313  
Patricia Buendia and Giri Narasimhan

*Gene expression*

**OrderedList—a bioconductor package for detecting similarity in ordered gene lists** 2315  
C.Lottaz, X.Yang, S.Scheid and R.Spang

*Genetics and population analysis*

**GeneRecon—a coalescent based tool for fine-scale association mapping** 2317  
T.Mailund, M.H.Schierup, C.N.S.Pedersen, J.N.Madsen, J.Hein and L.Schauser
