## ORIGINAL PAPERS

- **Gene structure prediction using information on homologous protein sequence**
  I.B.Rogozin, L.Milanesi and N.A.Kolchanov  
  Page 161

- **An annealing mutation operator in the genetic algorithms for RNA folding**
  B.A.Shapiro and J.Chu Wu  
  Page 171

- **qValue - A program to calculate comparative measures of genomic reorganisation from cytogenetic and/or linkage information**
  A.S.Law and D.W.Burt  
  Page 181

- **TAXOKEY: a universal taxonomic key program using DOS text files and graphics**
  J.A.Byers  
  Page 185

- **BioSCAN: a network sharable computational resource for searching biosequence databases**
  Page 191

- **CONRAD: a method for identification of variable and conserved regions within proteins by scale-space filtering**
  G.Herrmann, A.Schön, R.Brack-Werner and T.Werner  
  Page 197

- **Visualization of RNA secondary structures using highly parallel computers**
  A.Nakaya, K.Taura, K.Yamamoto and A.Yonezawa  
  Page 205

- **Detection of genes in *Escherichia coli* sequences determined by genome projects and prediction of protein production levels, based on multivariate diversity in codon usage**
  S.Kanaya, Y.Kudo, Y.Nakamura and T.Ikemura  
  Page 213

## COMMUNICATIONS

- **Image library of biological macromolecules**
  J.Sühnel  
  Page 227

- **Development of an animal genome database and its search system**
  Y.Wada and H.Yasue  
  Page 231

- **The Directory of P450-containing systems on WorldWide Web**
  K.N.Degtyarenko and P.Fabian  
  Page 237

- **IBIS version 3: An OSF/Motif-based interface for IBIS—integrated biological imaging system**
  J.-P.Rolland, M.J.Flifla, M.Garreau and D.Thomas  
  Page 241

## APPLICATIONS NOTES

- **RNAdraw: an integrated program for RNA secondary structure calculation and analysis under 32-bit Microsoft Windows**
  O.Matzura and A.Wennborg  
  Page 247

- **PM — Protein music**
  R.D.King and C.G.Angus  
  Page 251

- **Primer Master: a new program for the design and analysis of PCR primers**
  V.Proutski and E.C.Holmes  
  Page 253

- **Three sets of Macintosh AppleScripts for the automatic submission of sequence data to the Internet BLAST server**
  B.I.Osborne  
  Page 257
What's REALLY new in bioinformatics?

Find out on the Web!

The tables of contents and abstracts of all articles from current issues of *Computer Applications in the Biosciences* (CABIOS) are now available as part of the Oxford University Press Journals Awareness Service on the World Wide Web.

At the CABIOS home page you can:

**BROWSE** the most recent tables of contents and abstracts

**SEARCH** the tables of contents and abstracts for key words or for specific authors

**EXTEND** your search with OUP's Journals Awareness Service to cover all 160 of our journals, including:

- Glycobiology
- Human Molecular Genetics
- Protein Engineering
- The EMBO Journal
- Nucleic Acids Research
- IMA Journal of Mathematics Applied in Medicine and Biology
... and many others.

In other words, you can see a summary of the latest research results before they appear in the standard indexing services and before they appear in print.

We hope you will enjoy your visit to the CABIOS home page. Coverage of contents has started from the beginning of 1996 and is updated regularly - always ahead of publication of each issue. So do visit often. We can be found on the Web at: [http://www.oup.co.uk/cabios/](http://www.oup.co.uk/cabios/)

No Web access?
If you cannot access the World Wide Web from your own desktop, your library almost certainly can. Why not pay them a visit?

If you have any comment or query about the CABIOS web service, you can contact us at:
CABIOS, Oxford University Press, Walton Street, Oxford OX2 6DP, UK.
Tel: +44 (0)1865 267907 Fax: +44 (0)1865 267485.
